

HI-TECH STEEL BUILDINGS

Quality Is Our Strength

Hi-Tech Steel Buildings

WHO WE ARE

Hi-Tech Steel Buildings are a family owned business with offices in Derrylin, Co. Fermanagh, Northern Ireland and Bawnboy, Co. Cavan, Republic of Ireland. We are the sole official distributor in Ireland for Capital Steel Ltd, the largest steel building supplier in the UK.

We boast an excellent management team with decades of experience in the steel, insulation and cladding industries both in the UK and in Ireland.

WHAT WE DO Hi-Tech Steel Buildings are a premier supplier of high quality cold rolled steel buildings, and are the official distributor in Northern Ireland and the Republic of Ireland for Capital Steel Ltd, the largest steel building supplier in the UK.

Domestic

Agricultural

Industrial

Hi-Tech Steel Buildings supply a wide range of bespoke steel buildings including:

- ✓ **Steel Garden Sheds**
- ✓ **Steel Agricultural Buildings**
- ✓ **Steel Industrial Buildings**
- ✓ **Steel Equestrian Buildings**
- ✓ **Steel Domestic Garages and Offices**
- ✓ **Steel Commercial Buildings Including Workshops**
- ✓ **Steel Airport Hangers**
- ✓ **Steel Boat Houses**

In fact, we can create almost any steel building. You name it, and we will confidently design and engineer it to your exact requirements.

Each Hi-Tech Steel Building is designed, fully engineered and manufactured to the latest BS and Euro code standards. All our galvanised cold rolled steel and cladding products are manufactured by Steadman's Ltd UK (SIG Plc) and meet the requirements of CE marking, which became mandatory in the UK for many construction products in July 2013.

**Quality Is Our Strength. We Guarantee Excellent Value,
Unrivalled Quality And Superb Customer Care.**

DESIGN AND BUILD Hi-Tech Steel Buildings will remove all associated difficulty and worry concerned with the design of your steel building, and will support you through the planning process if required.

As a fully licensed CSB distributor for Northern Ireland and the Republic of Ireland, we can offer you a unique insight into how your building will

look prior to ordering, using our own unique software, giving you additional piece of mind. We can supply full design drawings and detailed structural calculations for submission to the planning office or building control if required.

Hi-Tech steel building structures are fabricated using extremely strong high tensile steel combined with Portal Frame methodology. Buildings are constructed in bays and are joined together by attaching purlins and rails horizontally between the sections. Purlins are normally of a 'Z' section or 'top hat' section design. Buildings constructed from cold-formed steel using the Portal Frame method have many advantages over the more traditional hot rolled steel buildings. With a cold-formed Portal Frame, the first advantage is cost. This is because cold-formed steel technology utilises significantly less steel than hot rolled steel sections. In addition, with cold-formed steel there is no need

for welding, as joints are bracketed and bolted together. They can then be delivered directly to your site from the factory already marked and cut to length with all holes punched. Reduced transportation costs are also achieved due to efficient stacking of the steel sections and cladding sheets. Furthermore, our buildings require no painting as the structure is pre-galvanised, giving the inside of your building a clean, almost clinical feel.

our **FREE** quotation and drawings - supplied within 2 working days

OUR GUARANTEE

All our buildings are guaranteed for 25 years

ADDITIONAL FEATURES

We have a wide range of additional features for your steel building including:

Roller Doors

Skylights

Personal Access Doors

Insulated Cladding

Rainwater Goods

Extensive Colour Range

DELIVERY & ERECTION

We provide a complete service package for the erection of your Hi-Tech bespoke cold rolled steel building, including:

- Detailed technical drawings for use with planning applications
- Full structural calculations
- Site surveys
- Steel building erection service

If you know the approximate size of your building please request your free quote online and we will provide you with a detailed quotation and drawings within 48 hours. Alternatively, please contact us for more information and to arrange a site visit.

Delivery

Your Hi-Tech Steel Building will be delivered to your site in kit form. This makes it easier to load and transport, thus saving time and cutting costs. These savings are then passed on to you, the customer, which is one of the reasons why our prices are so competitive.

Delivery is direct from the manufacturer; Steadman's Ltd UK (SIG Plc) using their own delivery fleet.

Self-Build

Your Hi-Tech Steel Building is wrapped and fully labelled by component. This means that there is no confusion, and the components are easy to store until you commence erection of your steel building.

A comprehensive guidance manual for the erection of your building is available for self-build projects. Please contact us for more information and to obtain your copy.

WHY HI-TECH STEEL BUILDINGS?

We offer FREE delivery of all steel buildings to site in kit form, cut to size, with all holes punched enabling easy erection for DIY customers. A self-build manual is included with every shed purchase, as is a full set of drawings and elevations, which can be submitted to the planning authorities if required. What's more, delivery only takes 3-4 weeks from receipt of your order.
